

“Fyrtårn II” (Restaurant lamp)

• Design: Peter Seidelin Jessen 2010

An oil lamp with a rustic, almost raw stainless steel design.

The glass is held tight with the o-ring principle of Delite (no rattling). A rubber base ensures that the lamp stands firmly on the surface.

The lamp is designed to use safe disposable oil containers (fuel cells) HD42 and HD50 from Hollowick or #840 from Ambria Crystalyte. We deliver the oil container HD50 with a 50 hour burning time.

Oil container HD50 - 6 pieces
Article no. 65 06 51

Spare glass
Article no. 65 05 50

Height 180 mm.
Weight 630g.

#840

HD50 Fuel Cell

HD42 Fuel Cell

Oil containers (fuel cells)

Burning times:

Approx. 42 hours with HD42 from Hollowick and #840 from Ambria Crystalyte.

Approx. 50 hours with HD50 from Hollowick.

About Delite

Delite is a small flexible company developing and producing design both for marine stores, where you'll find our oil lamps and instruments like clocks and barometers, and lighting shops where our electric lamps may be seen.

E.S.Sørensen is our brand for renowned classical oil lamps, clocks and barometers. Also the well-known Stormglasses and Galileiglasses. Please let yourself into his wonderful universe, key in www.essorensen.com.

Delite is our brand for modern design added a touch of maritime appearance like the tealight lamp the “Fyrskib” (Lightship), the “Petrolux” and the “Cabinlite”, oil lamps, as well as the Clausen weather stations. Furthermore, we produce a series of classic and modern lamps. The “Tubelite” in steel and glass is an example of a new, modern lamp. The Delite homepage is www.delite.dk.

We design, assemble and pack our E.S. Sørensen and Delite products in Måløv, 22 km west of Copenhagen, Denmark. Made in Denmark. We export most of our production to dealers in Europe and USA.

The Delite catalogue with all our products is published once a year. It is yours for free whenever you wish to study it. Get the Delite catalogue from your dealer, or please download it from www.delite.dk.

Why the name of “Delite”?

It is a play upon words: sounding like “delight” [di'lait] it is an associate to “lightness” and “joy”, or simply: delight!

Peter Seidelin Jessen was born in 1955, academic engineer in 1980 and a B. COM. in 1986. He has worked with development, project management and quality in the telecommunications and broadcasting fields. He founded Delite in 1996.

Pride in the details...

The Delite way of developing products.

Our Delite products are based on stainless steel and brass. “These two metals complement each other in the most beautiful way, although over the past few years we have with certain products only used stainless steel...” says Peter who established Delite back in 1996.

“...The product should look good, function well in practice, wear well, and last but not least, hold attractive technical and functional details. We are makers of ageless design aiming for the perfect aesthetical look and functionality! That's our taste and our source of pride in the details!”
